Gold Bond[®] Shaftliner XP[®]

Technical Information 800.NATIONAL • 800.628.4662

DESCRIPTION

Gold Bond® Shaftliner XP® gypsum panels consist of a mold-, mildewand moisture-resistant Type X gypsum core encased in a mold-, mildew- and moisture-resistant, 100% recycled PURPLE paper on the face and back sides.

Shaftliner XP is designed to provide extra protection against mold and mildew. The face paper is folded around the long edges to reinforce and protect the core, and the ends are beveled and finished smooth. Long edges of panels are beveled for ease of installation.

Shaftliner XP panels are designed to be used to construct lightweight fire barriers for elevator shafts (1-4 hr.), stairwells and area separation fire walls in multifamily housing. The panels are key components in the I-Stud, C-T Stud and C-H Stud Cavity Shaftwall Systems and the H-Stud Area Separation Fire Wall Systems.

BASIC USES

Applications

Use it to construct lightweight fire barriers for cavity shaftwalls (1-4 hr.) and area separation fire walls (2-3 hr.).

Advantages

- Approved component in specific UL fire-rated designs.
- Resists the growth of mold per ASTM D3273 with a score of 10, the best possible score.
- Resists the growth of mold per ASTM G21 with a score of 0, the best possible score.
- Features SPORGARD® technology with extra mold-inhibiting properties.
- Dimensionally stable product with negligible expansion and contraction under normal atmospheric conditions.
- · Cuts easily for quick installation.
- The gypsum core will not support combustion or transmit temperatures greatly in excess of 212°F (100°C) until completely calcined, a slow process.
- Achieves UL GREENGUARD Gold Certification for low chemical emissions into indoor air during product usage. For more information, visit: ul.com/gg.
- Qualifies as a low-VOC emitting material by meeting California Specification 01350. For more information, visit: calrecycle.ca.gov/greenbuilding/specs/section01350.

INSTALLATION RECOMMENDATIONS

General

Install Shaftliner XP consistent with methods described in specific application details for National Gypsum Cavity Shaftwall Systems or Area Separation Fire Wall Systems in NGC Construction Guide, or with other fire-resistance-rated designs.

Install fire-rated assemblies in accordance with the details found in the UL Fire Resistance Directory or Gypsum Association, GA-600, Fire Resistance Design Manual. Maintain adequate ventilation in the working area during installation and curing period.

LIMITATIONS

- · Avoid exposure to excessive or continuous moisture.
- Avoid exposure to extreme temperatures. Do not use shaftliner where it will be exposed to temperatures exceeding 125°F (52°C) for extended periods of time.
- Do not use shaftliner in an unlined air supply duct.
- Isolate shaftliner from contact with building structure in locations where structural movement may impose direct loads on shaftliner assemblies.
- Do not immerse Shaftliner XP in water and do not subject to cascading water.
- Do not install or treat joints until the building is properly enclosed.
 Do not install in pre-rock conditions.

Gold Bond[®] Shaftliner XP[®]

TECHNICAL DATA

Physical Properties	Shaftliner XP	
Thickness ¹ , Nominal	1" (25.4 mm)	
Width ¹ , Nominal	2' (610 mm)	
Length ^{1,4} , Standard	8' – 12' (2,438 mm - 3,658 mm)	
Weight, Nominal	3.75 lbs./sq. ft. (18.31 k/m²)	
Edges ¹	Double Beveled	
Flexural Strength ¹ , Perpendicular	≥ 228 lbf. (1,014 N)	
Flexural Strength ¹ , Parallel	≥ 77 lbf. (343 N)	
Humidified Deflection ¹	N/A	
Nail Pull Resistance ¹	≥ 87 lbf. (387 N)	
Hardness ¹ – Core, Edges and Ends	≥ 11 lbf. (49 N)	
Thermal Resistance⁵	R = .83	
Mold Resistance ⁶ , ASTM D3273	Score of 10	
Mold Resistance ⁷ , ASTM G21	Score of 0	
Product Standard Compliance	ASTM C1396	
Fire-Resistance Characteristics		
Core Type	Type X	
UL Type Designation	FSW	
Combustibility ²	Non-combustible Core	
Surface Burning Characteristics ³	Class A	
Flame Spread ³	15	
Smoke Development ³	0
